

Streamlined Energy and Carbon Report

Statement of carbon emissions in compliance with Streamlined Energy and Carbon Reporting (SECR) covering energy use and associated greenhouse gas emissions relating to gas, electricity and transport, intensity ratios and information relating to energy efficiency actions.

UK Greenhouse gas emissions and energy use data for the period	1 August 2020 to 31 July 2021	1 August 2019 to 31 July 2020
Energy consumption used to calculate emissions (kWh)	5,174,901	4,482,585
<u>Scope 1 emissions in metric tonnes CO2e</u>		
Gas consumption	650.27	518.49
Owned transport	Data not available	Data not available
Total	650.27	518.49
<u>Scope 2 emissions in metric tonnes CO2e</u>		
Purchased electricity	344.96	387.65
Business travel in employee owned vehicles	13.37	Data not available
Total	358.33	387.65
Total gross emissions	1008.60	906.14
<u>Intensity ratio</u>		
Metric tonnes CO2e per square foot	2.55	2.29
Metric tonnes CO2e per FTE staff member	2.67	2.47

Quantification and Reporting Methodology

We have followed the 2019 HM Government Environmental Reporting Guidelines. We have also used the GHG Reporting Protocol – Corporate Standard and have used the 2021 UK Government’s Conversion Factors for Company Reporting.

Intensity measurement

The chosen intensity measurement ratio is total gross emissions in metric tonnes CO2e per staff member, the recommended ratio for the sector.

Measures taken to improve energy efficiency

- Homeworking during the pandemic where appropriate and feasible for curriculum delivery
- Encouraged use of virtual technology for meetings, training and staff development
